

Case Study

DHL Express India

End User

DHL Express India Pvt. Ltd.

Location

Pan India

Vertical Market

Logistics

Partners

IndigoVision

Features

Full HD IP cameras

Multi-vendor integration using ONVIF

Background

DHL is a global leader in logistics operations with a presence in over 220 countries worldwide. In the first phase, the project required deploying cameras at their retail outlets at various cities within the country to improve operational efficiency and enhance customer experience.

Solution

Neural was selected to implement the solution. The deployed solution consists of a total of 77 HD cameras from IndigoVision (UK) at 77 retail locations. The solution consists of camera and recording solution at each location. IndigoVision video management system (VMS) "Control Centre" is the platform chosen for the solution. The VMS is ONVIF compliant and capable of integrating multiple ONVIF compliant vendors into a single platform to provide integrated security. The solution was designed to occupy minimal footprint in the retail outlet and yet provide the full functionality of a professional high quality CCTV system.

The system was commissioned in April 2015 within a span of just 45 days.

Customer Benefits

- Full HD cameras at each location to capture vivid detail
- Full HD recording of cameras for 45 days at each location
- Fully ONVIF compliant system giving maximum flexibility to DHL to choose any third party ONVIF compliant vendor
- Small footprint for minimal space consumption
- System ready for centralized monitoring over VPN / Leased Line connectivity
